

Press release

Stuttgart/Germany, June 18, 2021

Filling quantity tool from MAHLE now also available online

- MAHLE Aftermarket further expands its range of digital information in the field of thermal management
- New online filling quantity tool provides the correct refrigerant and oil quantities for passenger cars and commercial vehicles
- Can be viewed on any device, making it easy to use in the workshop

MAHLE Aftermarket is resolutely pursuing its digital strategy and adding a new online filling quantity tool to its range of thermal management services. The tool provides information in seven languages on the correct refrigerant and oil quantities for passenger cars and commercial vehicles, and it works on PC, tablet, and smartphone, so it can be accessed at any time. The favorites function allows you to flag your most popular vehicle types and quickly call them up again when needed.

During an AC service, for example with the MAHLE ACX 480, precise amounts of coolant and oil have to be used.

The new filling quantity tool is a further addition to the range of digital products available from MAHLE, which also includes the TechTool, the knowledge database for air conditioning technology, MAHLE Insider, and the digital customer magazine MPULSE. The digital CustomerCare Portal puts MAHLE Aftermarket in direct contact with its customers—offering support on numerous topics from identifying a component to providing installation information and troubleshooting. With the continually updated digital RMI (repair and maintenance information) on MAHLE service equipment, the company guides workshop technicians through the entire maintenance process. This is complemented by a comprehensive digital training program

and a growing e-commerce portfolio for filters, thermal management products, service equipment, and vintage car parts.

The MAHLE filling quantity tool can be accessed via the following link:

About MAHLE

MAHLE is a leading international development partner and supplier to the automotive industry. The technology group is now broadly positioned in the areas of powertrain technology and thermal management with a clear focus on future topics relating to mobility. As part of its dual strategy, MAHLE is working both on the intelligent combustion engine for the use of hydrogen and other nonfossil fuels and on technologies that will help the fuel cell and e-mobility achieve broad acceptance in the markets. The product portfolio of the company, which was founded in 1920, addresses all the crucial aspects of the powertrain and air conditioning technology. Half of all vehicles in the world now contain MAHLE components. #weshapefuturemobility

In 2020, MAHLE generated sales of approximately EUR 9.8 billion and is represented in over 30 countries with more than 72,000 employees in 160 production locations and 12 major research and development centers. (Last revised: 2020-12-31)

About MAHLE Aftermarket

MAHLE Aftermarket, the business unit specializing in spare parts, uses the expertise from the series production of original equipment in its product range and supplies trade, workshop, and engine repair partners. The portfolio also includes products developed by MAHLE Service Solutions for workshop equipment as well as comprehensive services and customized training programs.

MAHLE Aftermarket is represented at 25 locations and other sales offices worldwide, with around 1,700 employees. In 2019, the business unit achieved a global sales volume of about EUR 950 million.
